RESPECTED SIR/MADAM,

We are pleased to inform you that we "**Praxis Automation Services**" provides **Campus Placements, Job Oriented Industrial Training Program** on Industrial Automation and Instrumentation based at Jamshedpur (Jharkhand).

We provide **Industrial Automation Training program, Summer Training & Short term training programs** on **PLCs, HMIs, SCADAs, Drives, Electrical, DCS, AutoCAD, Instrumentation and Panel Designing** to sharpen the skills of working / Trainee engineers (GTEs) to meet their industrial requirements & enhance their placement opportunity.

Praxis Automation Services provides dedicated knowledge and practical hands-on automation technologies. Our Organization has been developed on the modern concept of sharing & learning in peaceful ambience. It is managed by matured, qualified & experienced professionals.

Kindly find an **attachment of our Company Profile and Proposal** and kindly visit our Company websites: [www.praxisautomation.co.in](http://www.praxisautomation.co.in)

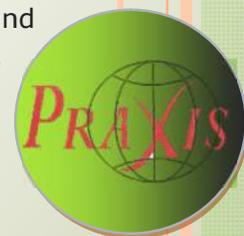

**We can conduct a seminar at your reputed campus that will be free of cost to create awareness on industrial automation. Please let us know in case of requirement of training proposal at your Institution.**

We have already provided Training to many college students in Jharkhand, Bihar and Orissa. This training can be provided at your institute or at your college campus.

Kindly acknowledge & we shall be grateful if you can spare a little time and let us know if there is any requirement. Kindly contact the undersigned for any queries.

THANKS & Regards

R.K.Dubey  
Director

# ABOUT US

PRAXIS AUTOMATION SERVICES is one of the leading Automation & Instrumentation company providing Sales and Services Solutions to various Industrial Sectors such as Steel, Power, Process, Food & Beverages, Water treatment, Automotive, Raw Material Handling and many other sectors with wide range of multi-disciplinary Supports.

PRAXIS is professionally run by technocrats having more than 20 years of experience in Automation & Instrumentation field for working at different areas like Customer support / Training / Project execution. We have rich experience in providing automation solutions to Indian & overseas Industries & strong presence in rich industrial belt of Eastern India. The

employees specially trained to achieve excellence in each and everything that they do which ultimately provides excellent customer satisfaction.

We at Praxis Automation Services are committed to bridge this gap by Strengthening the practical Knowledge of Engineers / Professionals / Technicians by imparting Practical Oriented training on various Industrial Automation Systems (PLCs, SCADA, HMI, DRIVES, PLC NETWORKING, PROCESS INSTRUMENTATION, PANEL DESIGNING, AUTOCAD, DCS). We systematically route them to untapped and infinite potential existing in industrial Automation Segment.

# CAREER & TRAINING PROGRAM

Last few decades have observed that the gap between the skills required for industries and skills possessed by engineers / engineering professionals has created a peculiar situation where in even though in abundance, industry is short of trained hands. There are complex Industrial Automation control systems installed / being installed across industries. There is a need to

understand and acquire knowledge of these systems to keep the productivity and profitability high, reduce downtime of machines and troubleshoot the systems faster.

Our training courses are developed and kept up to date through a major investment in ongoing dedicated courseware development process. Our courses offer extensive hands on lab time on specially designed training work station and simulators. Our training courses are conducted by certified instructors, who are well industrial experience on Automation products.

We organize Summer / Winter Training programs In-campus or our AT Training Centers. Engineering colleges / Diploma Institutions desirous of organizing Summer / Winter Training programs for your Electrical / Electronics & Communication / Instrumentation / Computer Science & Mechatronics Students on PLC, SCADA, DRIVES, DCS, HMI etc.

Human capital is the most important asset of any organisation. They need to be technically competent, productive & focussed. Investment in productive training programs yields better results.

We customize the training needs of various corporate in India and abroad as per their plant/maintenance requirements. We are specialist & one-stop shop offering customized training solutions in-plant or at our facilities. We have best pool of faculties with exhaustive automation industry experience.

# TRAINING CURRICULAM

## TRAINING CURRICULAM

**We provides Training on:**

### **PROGRAMMING OF PLC (PROGRAMMABLE & LOGIC CONTROLLER)**

Programmable Logic Controllers (PLCs) are microprocessor-based devices used to control industrial processes or machines. They provide advanced functions, including analog monitoring, control and high speed motion control as well as share data over communication networks.

### **SCADA DEVELOPMENT**

SCADA (supervisory control and data acquisition) is a type of industrial control system that monitor and control industrial processes that exist in the physical world. SCADA systems historically distinguish themselves from other ICS systems by being large scale processes that can include multiple sites, and large distances.

### **COMMISSIONING OF VARIABLE SPEED DRIVES**

A VFD (Variable Frequency Drive), or rather a VVFD (Variable Voltage and Frequency Drive) is a precision electronic device specifically designed and used to control the speed of AC induction motors (single as well as three phase) without affecting the electric consumption, torque, impedance, magnetic flux, etc. of the motor.

### **PROCESS INSTRUMENTATION**

Instrumentation is defined as the science of measurement and control of process variables within a production or manufacturing area such as flow, temperature, level, distance, angle, or pressure. The control of processes is one of the main branches of applied instrumentation.

# SUMMER / WINTER TRAINING WITH PROJECT GUIDANCE

## SUMMER / WINTER TRAINING WITH PROJECT GUIDANCE

Summer / Winter Training Program is a career oriented industrial training certification program for engineering students. It is a rigorous, well-rounded training program that imparts practical knowledge in Automation, Instrumentation, Wireless System, Small Engineering Projects.

We make sure that our courses and projects are relevant to the workforce and will help to Engineering Students and Industrial Candidates.

Although this industrial training program is meant for engineering students, this does not stop undergraduates, graduates, and post graduates from any field to register. All you need to have is a basic understanding of Automation.
